To "ERASMUS SA"

18 years ago I had a first collaboration with "ERASMUS". At this time "ERASMUS" took care of the 3rd Common Meeting of the Cervical Spine Research Society-European Section. The meeting was a successful one and the contribution of "ERASMUS" was well recognized.

So, the decision to ask "ERASMUS" to organize this year's 26th Annual meeting of the CSRS-ES was based to the previous experience I had and I was not disappointed at all. "ERASMUS" demonstrated again the some qualities that is a great responsibility and a sense of organization which was really outstanding for the far first moment to the final closure of the meeting.

Vicky Nikolopoulou and her team, armed with great patience, worked very hard for this positive result, and she received the congratulations of the participants and the thanks of the scientific committee and of the Board of the CSRS-ES.

"ERASMUS" Thank you once more for not disappointing all of us.

Looking for a future collaboration

I remains,
Professor D.S.Korres
